

A Brighter, Cleaner Delaware: Tapping Renewable Energy Resources

We're lucky to live in a state that recognizes the twin power of energy efficiency and clean energy sources like solar, wind and geothermal. Energize Delaware's renewable energy programs are focused on helping Delawareans save money, create jobs and improve the environment. Renewable energy is a smart way to reduce your carbon footprint, stabilize electric costs, and preserve natural resources.

Energy Education: Knowledge is Power

Making your home or business energy efficient and protecting our environment may sound costly or complicated, but it's not. In fact you only have to remember three things:

- **RETHINK** how you use energy;
- **RECEIVE** rebates and tips on saving energy and money;
- As a result, join in the movement to **RENEW** our planet.

That's what Energize Delaware is all about. We provide rebates, tips, low interest financing and other energy-saving solutions to residents, businesses, non-profits who want to reduce their utility bills and protect our state's natural resources.

The Sustainable Energy Utility and Energize Delaware

The Delaware Sustainable Energy Utility (DESEU) is a unique non-profit organization offering a one-stop resource through its Energize Delaware initiative to help residents and businesses save money through clean energy and efficiency. The DESEU was created in 2007 by the state of Delaware to foster a sustainable energy future for the state.

Green Grant Delaware Solar Thermal and Geothermal Program

To discuss this program in greater detail please contact the Tony DePrima, Executive Director, Delaware Sustainable Energy Utility at 302.883.3048 or by email at tony.deprima@deseu.org

Green Grant Delaware Solar Thermal and Geothermal Program

Rebates are available for solar hot water and geothermal systems up to \$200,000. This program is open to non-residential and non-profit customers anywhere in Delaware regardless of utility jurisdiction.

SEU

Objective

To create demand for solar thermal and geothermal technologies in Delaware and grow green jobs, the Delaware Sustainable Utility (DESEU) and Delaware Department of Natural Resources and Environmental Control (DNREC) jointly launched a new incentive program for solar hot water and geothermal systems.

General Program Limits

- Rebate up to \$200,000 for either technology
- Project limit set at 80% of thermal load

Geothermal

Rebate Amount

- Non-residential: \$800/ton for the first 2 tons and \$700/ton for over 2 tons
- Non-profit: \$1000/ton for the first 2 tons and \$800/ton for over 2 tons

Eligibility Requirements

- Energy Efficiency Rating (EER) of at least 18; and
- Coefficient of Performance (COP) of at least 3.6

Solar Thermal

Rebate Amount

- Non-residential: \$1 per kWh saved
- Non-profit: \$1.5 per kWh saved

Eligibility Requirements

- OG-300 certification by the Solar Rating and Certification (SRCC); or
- Energy savings calculated by licensed Delaware professional engineers

Application Process

Apply at www.greengrantdelaware.com. Rebates are paid directly to grantee following project completion.

Providing Delaware with clean, sustainable energy solutions for a safe, secure future.
